

## Virtual Baccarat Game – Instructions & Objective

### Objective of the Game:

The goal of the Virtual Baccarat Game is to bet on which hand — the *Banker* or the *Player* — will have a total card value closest to **9**. You win if your chosen side wins.

---

### How to Play:

#### 1. Choose Your Side

- You can bet on either:
  - 1 - Banker
  - 2 - Player

#### 2. Place Your Bet

- Enter an amount of money (PHP) that does not exceed your current balance.

#### 3. Card Drawing Rules

- Both the *Banker* and the *Player* are dealt **2 cards** initially.
- If the total of the two cards is **8 or 9**, this is a "Natural Win" and no third card is drawn.
- Otherwise, a **third card** is drawn for both sides, and the new total is calculated modulo 10.

#### 4. Determine the Winner

- The hand with the final total **closest to 9** wins.
- If both sides have equal totals, it's a **Draw**.

#### 5. Payouts

- If your bet is on the winning hand, you win **1:1 payout** of your bet.
- If you lose, your bet is deducted from your balance.
- If it's a draw, your balance remains the same.

#### 6. Play Again or Exit

- After each round, choose whether to continue playing or end the session.
- 

### Game Stats

After ending the session, the game displays:

- Total Wins
- Total Losses
- Game History (Win/Lose/Draw)
